## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 09 April 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

### DETAILED ACTION

This Office Action is in response to amendments filed April 9, 2004. Claims 2-6 have been cancelled as requested by Applicants. Claims 1, 7-14 are presented for further examination. Claims 15-27 are presented for initial examination.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1- are rejected under 35 U.S.C. 102(e) as being anticipated by Lai et al. (hereinafter "Lai", US 2001/0052057 A1).

As per claims 1, 15, 22, Lai discloses a communication device for transferring data between two devices coupled to a network, said communication device comprising:

- A dual-port memory for storing data (paragraphs [0026], [0028]);
- A high-speed interface for transmitting, said data between a first device and said dual port memory, wherein said high-speed interface

communicates data at an initial rate (paragraphs [0026]-[0028], [0030]-[0031], [0033]);

- A plurality of low-speed interfaces, each connected to a respective one of a plurality of links to said second device, for transmitting data from said dual-port memory to said respective one of said plurality of links at one of a plurality of data rates, wherein at least two of said plurality of data rates are unequal and are fractions of said initial rate, all said fractions being capable of reduction to a common denominator and at least one of said fractions being irreducible (paragraphs [0030], [0034]-[0035], [0037], [0041]);
- Controller for controlling said memory and said interfaces and for monitoring a data rate of said data between said memory and said plurality of links, wherein said controller includes means for cyclically distributing data to be communicated from said memory to said second device among said low-speed interfaces, such that each of said plurality of low speed interfaces receives a number of consecutive units of said data equal to the numerator of its associated fraction (paragraphs [0012], [0027], [0030], [0040]).

As per claims 7, 16, 23, Lai discloses the communication device of Claim 1, wherein, at least one of the set of said high-speed interface and said plurality of low speed interfaces comprises means for establishing a connection with a modem (paragraphs [0030], [0033]-[0034]).

As per claims 10, 17, 24, Lai discloses the communication device of Claim 1 wherein said hi-speed interface further comprises means for receiving said data at an said initial rate, wherein said initial rate is equal to a sum of said plurality of data rates (paragraphs [0030]-[0031], [0034], [0036]-[0037]).

As per claims 11, 18, 25, Lai discloses the communication device of Claim 10, wherein at least two of said data rates are equal (paragraphs [0037]-[0038]).

As per claims 12, 19, 26, Lai discloses the communication device of Claim 1, wherein said initial rate equals a sum of said plurality of data rates (paragraphs [0030]-[0031], [0034], [0036]-[0037]).

As per claims 13, 20, 27, Lai discloses the communication device of Claim 1 said controller further comprises means for reporting said data rates (paragraphs [0012], [0027], [0030], [0040]).

As per claims 14, 21, Lai discloses the communication device of Claim 1, wherein said high speed interface further comprises means for transmitting said data at said initial rate wherein said initial rate is equal to a sum of said plurality of data rates and at least two of said data rates are unequal (paragraphs [0037]-[0038]).

***Response to Arguments***

**The Office notes the following arguments:**

- (a) Swales does not explicitly disclose each feature recited by Amended claim 1.
- (b) Applicants submit that Claim 1 is not rendered obvious by the combination of Swales with Zikan, because the combination does not teach or suggest all of the elements of Applicant's amended claims.

**In response to:**

- (a)-(b) Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

- 3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
